

Update: Release cycle and OpenTM2 development

Since the last blog post in 2016 there had been a steady OpenTM2 development, with ~3 releases per year.

Most of the development is still driven and backed by IBM, with some minor inputs coming from the community once in a while.

The release cycle will stay with 2 major releases / year and minor releases, when necessary.

Lastest OpenTM2 releases can always be found at [the OpenTM2 installer section](#) of this site.

If there is interest or need regarding community driven development: Please contact community-support@opentm2.org
